Scan Available**  
Please contact your  
Account Manager for  
more information

Everywhere we look, organisations are being hacked when they least expect it. IT security teams used to rely on simple anti-virus solutions and basic firewalls to keep networks, applications and hardware safe from potential threats, but in today's fast-moving, Cloud-driven environment, this level of security is no longer fit for purpose.

### VULNERABILITY SCANNING SERVICE

Cybercriminals actively seek out exploitable gaps within your customer's security to cause substantial damage to their brand reputation, finances and data. It is therefore imperative to conduct regular vulnerability assessments to proactively identify and resolve weaknesses within their corporate infrastructure, before they can be exploited.

Our Vulnerability Scanning service, identifies and remediates vulnerabilities by delving into your customers security infrastructure to proactively hunt out threats and patch risks.

Our scalable solution provides tailored vulnerability reports for both management and technical staff, along with action plans to mitigate any threats to their business.

### THE EXPANDING THREAT LANDSCAPE

The distributed workforce has resulted in new challenges when it comes to the visibility, control and security of endpoint devices. Instead of your customer's teams working from a secure location at their head office, the rapid rise of home working has exposed new security vulnerabilities, such as concerns over shadow IT. Even with best efforts, your customer's simply initiating another series of security patches and firewalls to keep their infrastructure protected has become insufficient, as hackers will spend (on average) one fifth of the time infiltrating their network, application or hardware than it would take to successfully implement an appropriate security patch.

### TAKE SYSTEMATIC, PREVENTATIVE MEASURES

EXPO.e offer a Vulnerability Scanning service that examines network perimeters, identifies vulnerabilities and provides actionable remediation with risk-based insights. Mimicking the actions of the most effective cybercriminals, we add an extra layer of value by analysing and advising where your customer should implement extra precautions.

## FEATURES AND BENEFITS

### Automated Scan Schedule

Finds new assets and adds them to your regular vulnerability scans automatically with smart scan scheduling, helping your customer achieve greater efficiency in their effort to reduce vulnerabilities

### Agent-based Scanning

Agent-based scanning enables organisations to extend security controls to remote workforces and achieve greater efficiency by assessing remote assets for vulnerabilities.

### Scanning-less Scanning (SLS)

Unique SLS technology takes a fingerprint of your customer's network and alerts them of potential new risks as they appear in between scans to keep them up to date.

### Dynamic Target Management

Effectively manage your customer's assets by using dynamic groups to segment and map their targets, for example, by location, business unit or asset owner. Using meaningful categorisations, they improve efficiency.

### Solution-based Reporting

Our detailed reports help identify and filter your customer's security priorities, as well as providing actionable insights on how to resolve vulnerability issues. With different levels of detail, they can share the information with other stakeholders across their business.

### Risk based Vulnerability Prioritisation

Using industry standards CVSS rating and real time risk based scoring, our tool enables smarter and predictive vulnerability prioritisation for fast remediation.

## EXPO.E NOT JUST ANOTHER MSSP

**EXPO.e** helps all organisation identify and enhance their Cyber Security controls. We help all our customers remediate vulnerabilities, threats, and breaches extremely seriously. With experienced consultants, best-of-breed technologies and impeccable service quality, we can offer Cyber Security solutions for any organisation - no matter the size or sector. **EXPO.e's** Cyber Security product portfolio demonstrates our ability in providing expertly managed security solutions to our customers, encapsulating:

- Nearly 20 years' experience as a provider of Managed Security services.
- 24 / 7 UK-based Security Operations Centre.
- CSOC Managed Service, for real-time monitoring and alerting.
- 9x ISO accredited organisation. **EXPO.e** are committed to compliance, excellence and GDPR requirements.
- Platinum partnerships with numerous industry-leading Cyber Security vendors.
- Expertise and initiative from our experienced and certified consultants (CISSP, CISM, PCIP, ISO27001 and PCIP).
- Custom-built, cutting-edge Cyber Security solutions designed by our qualified security pre-sales team.
- Consistently high quality delivered on time and in budget.
- Experience across a wide range of sectors and industries. We can provide a strong set of testimonials to demonstrate our Cyber Security capabilities.

**EXPO.e** is a Cloud, Connectivity and Communications pioneer with a difference.

From launching the world's first Virtual private LAN in 2006 on our privately-owned 100GigE secure and super-fast Network to our recent launch of the world's first Software Defined Digital Platform (SD-DP), our commitment to innovation has resulted in us being recognised as one of the fastest-growing private companies in the UK, with 9 ISO accreditations to our name.

We have an extensive solutions portfolio that enables us to create services tailored specifically to our customers' operational needs whether that be for Private, Public or Hybrid Cloud, Data Centre, Unified Communications, Cyber Security or Managed IT Services.

Whether it's for a single service or transformative solution, we deliver Peace of Mind-as-a-Service to our customers: that's why we are trusted by over 3,000 customers, with 96% reference-ability and an **industry-leading Net Promoter Score**.
